EDUCATION

Georgia Institute of Technology, Atlanta, GA **Aug. 2022 – May 2026**
B.S. Computer Science, GPA: 4.0

- **Coursework**: Design & Analysis of Algorithms, Computer Architecture, Data Structures, Probability & Statistics, Combinatorics, Linear Algebra, Multivariable Calculus, Honors Discrete Math

EXPERIENCE

Pr(Ai)^{2}R Group **Remote**
Research Intern *October 2024 – Present*

- Working on novel hypernetwork-based architecture for automating language model intepretability via causal interventions on activations (in review at ICLR) mentored by Atticus Geiger
- Developing novel method for generalized causal interventions as an alternative to existing SOTA method, Distributed Alignment Search

Automorphic (YC S23) **San Francisco, CA**
Founding Engineer & Researcher *June 2023 – August 2024*

- First hire, worked on scalable domain knowledge infusion through context compression and efficient architectural modifications, sample-efficient preference optimization, model-editing (co-authored EMNLP 2024 main conference paper)
- Developed scalable and highly customized experimental infrastructure for data processing, generation, training, and inference of language models

Confirm Labs **Remote**
Researcher *April 2024 – October 2024*

- Trained cross-layer sparse autoencoders and demonstrated causal connectivity between layers with both empirical and mathematical justifications (cited in Anthropic cross-coders research update)

Oak Ridge National Laboratory **Oak Ridge, TN (Remote)**
Research Intern *June 2023 – July 2023*

- Adapted the Relational Transformer and Tokenized Graph Transformer architectures to support property prediction tasks on crystal structures

Fung Lab, Georgia Tech **Atlanta, GA**
Undergraduate Researcher *Sept. 2022 – July 2023*

- Developed a novel model-agnostic method involving virtual nodes to improve performance of graph neural networks on metal organic framework property prediction tasks

TECHNICAL SKILLS

Languages Python, Java, C, JavaScript, HTML/CSS, LaTeX

Skills PyTorch, Docker, Git, Ray, Slurm, GCP, Azure, Linux, CAD & prototyping
