EDUCATION

Georgia Institute of Technology

Aug. 2022 – May 2026

B.S. Computer Science, GPA: 4.0

Atlanta, GA

- **Coursework:** Design & Analysis of Algorithms, Computer Organization & Programming, Data Structures, Probability & Statistics, Combinatorics, Linear Algebra, Multivariable Calculus, Honors Discrete Math
- **Awards:** President's Undergraduate Research Salary Award (Summer & Fall 2023), Faculty Honors

EXPERIENCE

Founding Engineer & Researcher

June 2023 – Present

Automorphic (YC S23)

San Francisco, CA

- Topics: scalable domain knowledge infusion through context compression and efficient architectural modifications, sample-efficient preference optimization, multi-modal agents for the web
- Developed & maintaining various internal tooling and distributed experimental infrastructure for data processing, training, and inference of language models

Researcher

April 2024 – Present

Confirm Labs

Remote

- Working on unsupervised methods for circuit discovery in language models for language models
- Trained cross-layer sparse autoencoders and demonstrated causal connectivity between layers
- Helped develop hypernetwork-based model editor architecture that intervenes on a target model's activations given natural language instructions

Research Intern

June 2023 – July 2023

Oak Ridge National Laboratory

Oak Ridge, TN (Remote)

- Adapted the Relational Transformer and Tokenized Graph Transformer architectures to support property prediction tasks on crystal structures and explored heterogeneous GNN architectures

Undergraduate Researcher

Sept. 2022 – July 2023

Fung Lab, Georgia Tech

Atlanta, GA

- Developed a novel model-agnostic method involving virtual nodes to improve performance of graph neural networks on metal organic framework regression tasks (PURA recipient)
- Maintained core research software, implemented distributed training, hyperparameter optimization, large-scale data preprocessing optimized for graphs

RESEARCH

Gupta, A., Baskaran, S., & Anumanchipalli, G. (2024). Rebuilding rome : Resolving model collapse during sequential model editing. EMNLP 2024 (Main Conference). Retrieved from <https://arxiv.org/abs/2403.07175> (link, pdf, code)

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, HTML/CSS, $\text{\LaTeX}$

Skills: PyTorch, Docker, Git, Ray, Slurm, GCP, Azure, Linux, CAD & prototyping
